INGRID HOFFMAN

Profile Full-stack web developer with emphasis on design and application architecture
I thrive on learning and growth, turning thoughts into action, and going above and beyond the expected outcome. I excel at understanding the needs and goals of projects and clients to optimize strategies for successful results.

Career Summary Bringing valuable expertise and experience to a new career path.
Through a breadth of experience in architecture and design, I have developed valuable skills and knowledge that translate directly to the world of technology including:

- Creating intuitive and aesthetically pleasing user facing design
- Building a functional, logical, and efficient framework
- Structuring for an authentic integration of back-end and front-end experience
- Strength in translating iteration and changing variables into innovation for an improved outcome

Proficiencies **Technical Skills**
HTML, CSS, Bootstrap and other frameworks, Responsive Design
Javascript, JQuery, ES6+, AJAX
Node.js, Express, MySQL, MongoDB

Transferable Skills
Project Management - budgets, schedules, team coordination, resource and labor allocation
Communication - understanding and translating between areas of expertise and stakeholder priorities
Clifton Top 5 Strengths: Learner, Relator, Activator, Maximizer, Strategic

Recent Experience Associate, Project Manager. LRS Architects. January 2014 - March 2020
Co-lead for the Interior Design Studio

- Managed projects and teams, guiding project design from concept through implementation
- Instigated, championed, and implemented a graphic brand refresh of all collateral
- Advocated for improved integration of specialties in the project design process

- Co-chair of Membership Committee for Portland chapter of Commercial Real Estate Women

Sole Proprietor, Interior Designer. Inspace Design. May 2005 - January 2014

- Provided full-service interior planning and design for residential, commercial, and hospitality projects including new construction, remodels, renovations, and tenant improvements
- Designed and built an intuitive e-commerce site offering individualized packages to augment the traditional design service model

Education Full-Stack Web Development. University of Oregon.

Bootcamp program for proficiency in front-end and back-end development with a cutting-edge curriculum based on in-demand technologies.

Professional Program Interior Design. UCLA Extension.

Intensive graduate level program for residential and commercial interior design.

B.S. Architectural Engineering. Stanford University.

Individualized blended study of architecture, urban planning, engineering, structures, management, product design, and art.
